How to measure:

Measure the distance from the tip of the big toe to the outermost point of heel.

We recommend using a piece of paper and marking the tip of the big toe and the outermost part of the heel.

Measure both feet as it is common for one foot to be a slightly different length.

Please ensure your weight is evenly distributed between both feet and the paper does not move.

Use a measuring tape or ruler to measure the distance between the two points.

Use the larger foot measurement to compare to the size chart. If in between sizes, we recommend selecting the bigger size.
